

Shaswata De

ECE Engineer(3rd Year)

D.O.B.: 11th May 2005

CONTACT

- 9679072752
- deshaswata2023@gmail.com
- Arambagh ,West Bengal

LANGUAGE

- Bengali, English, Hindi

SKILLS

- Python, Numpy, Pandas
- FASTAPI(Backend)
- Machine Learning
- DSA in JAVA
- Data Science
- My SQL
- Streamlit
- HTML, CSS, GitHub, Docker
- Natural Language Processing
- Project Management
- Neural Network(ANN,CNN,RNN)

AWARDS

Securing First position in class 12th Board Exam from Arambagh High School 2023

ACHIEVEMENTS

- IIT-JEE MAINS (2023): Score 96.7 Percentile
- WBJEE (2023): GMR-2091

PROFILE SUMMARY

Electronics and Communication Engineering student skilled in Machine Learning, Deep Learning, Python, and Java. Experienced in developing AI-powered projects including image classification and data visualization. Proficient in Python, TensorFlow, Scikit-learn, and Matplotlib, with strong problem-solving skills and a passion for innovative, real-world AI solutions.

EDUCATION

Secondary Examination(Class 10 th)WBBSE 2021

Major Subject: Bengali, English, Math, Science, History, Geography
Arambagh High School, Arambagh, West Bengal
First Division, Percentage: 93.6%

Higher Secondary Examination(Class 12 th)WBCHSE 2023

Major Subject: Physics, Chemistry, Math and Biology
Arambagh High School, Arambagh, West Bengal
First Division, Percentage: 94.2%

B.Tech (Electronics and Communication Engineering) 2023-2027

Kalyani Government Engineering College, Kalyani, West Bengal
First Class with Average CGPA 8.5 (till 4th Sem)

PROJECTS COMPLETED

Olympic Data Analysis and integrate with Streamlit

Performed data analysis on Olympic datasets using Python, Pandas, and Plotly. Generated heatmaps, comparative graphs, and interactive visualizations to explore trends, medal tallies, and country-wise performance. Focused on insightful presentation of historical sports performance data.

Potato Diseases Classification using CNN and FASTAPI integration

Developed a Convolutional Neural Network to classify potato leaf images into Early Blight, Late Blight, and Healthy categories. Achieved accurate predictions with data augmentation, and integration into a FastAPI-based drag-and-drop user interface.

Snake game using python OOPS and Turtle

A well maintained Snake game in Python using Turtle graphics and OOP principles. Features difficulty selection, pause/resume, and persistent high score tracking. Organized into modules for snake movement, food generation, and scoreboard display, ensuring clean, maintainable, and feature-rich gameplay experience.

PROJECTS ONGOING

SmartGrocer – AI-Enabled Grocery Management System Using Streamlit and FASTAPI

Built a full-stack grocery management system with user/admin login System, smart cart, billing, coupons, and reviews. Implemented AI-based product recommendations and chatbot-assisted shopping for personalized customer experience. Developed admin dashboards for revenue analytics, customer insights, inventory control, dynamic pricing, and sales tracking.
